***Page 7, please enter the clean version of paragraph 1.***

b1  
Figures 5a-5e schematically show various arrangements of an apparatus for filling one or more cartridges having multiple compartments.

***Page 9, please enter the clean version of paragraph 2.***

b2  
Figures 5(a)-5(e) schematically show an apparatus for filling multiple compartment cartridges in accordance with the present invention. In Figure 5(a), a reservoir R provides a supply of the fluid used to fill the cartridges. Two metering pumps P1, P2 are connected to the reservoir R. Two filling tubes T1, T2 are connected to the two metering pumps P1, P2, respectively. Each filling tube T1, T2 simultaneously fills one of the two-compartments 24a, 24b in the compartment cartridge 10' with the fluid.

***Page 10, after paragraph 3 (line 16), please enter the new paragraph:***

b3  
Figure 5(e) shows an embodiment of the invention for simultaneously filling two-compartments 24a and 24b from a single pump P1 supplied by reservoir R.
